

REMARKS

This request for reconsideration is submitted to bring the present application into condition for allowance.

During a telephone conversation with Examiner on July 18, 2007, it was determined that the Office did not receive the supporting material to Affidavit/Declaration filed on January 16, 2007 under 37 CFR 1.131.

In order to correct that error/omission, the Applicant submits the document quoted in the Affidavit/Declaration: report/working document which incorporates the system described in the present invention (U.S. Patent Application Serial No. 10/688,210) and implemented and tested by Bitfone Company using the present invention. The document is dated October 2002 before the filing date of references quoted by the Examiner in the Office Action.

The applicant is of opinion that this document represents a proof of what the Examiner was looking for to support the affidavit quoted above. According to Affidavit/Declaration submitted under 37 CFR 1.131, one of the inventors (Mika Leppinen) declares that the actual reduction to practice (with a working prototype successfully tested) of the present invention occurred before November 12, 2002 thus antedating the filing dates of all references quoted by the Examiner which are listed in the Office Action of June 27, 2007. Thus rejections under 35 U.S.C. 102(e) and under 35 U.S.C. 103(a) comprised in the Office Actions of October 16, 2006 and June 27, 2007 are unapplicable and should be dismissed.

The Applicant requests the withdrawal of all rejections under 35 U.S.C. 102(e) and under 35 U.S.C. 103(a) listed in the Office Action dated June 27, 2007.

\*\*\*

The objections and rejections of the Office Action of June 27, 2007 having been shown to be inapplicable, withdrawal thereof is requested and passage of claims 1-21 to issue is solicited.

Respectfully submitted,

Anatoly Frenkel
